Hiring Team, E-Sutra Technologies Private Limited

Re: Application for **MERN Full Stack Intern**

Dear Hiring Manager,

I am a second-year BCSIT student and MERN developer applying for the Full Stack Intern role at E-Sutra Technologies. I have independently built and deployed production-ready applications — including a full LMS with eSewa payment integration, JWT authentication, and role-based access control — and recently won my college hackathon. I am eager to contribute real work while growing under experienced mentorship.

My skills align directly with your requirements: REST API development with Node.js and Express.js, MongoDB schema design, React.js with Redux Toolkit and Tailwind CSS, and cloud deployment on Vercel and Render. I have also implemented bcrypt hashing, protected routing, and Cloudinary media management in live projects. I am currently expanding into TypeScript and Next.js.

Key highlights:

- Two live, deployed MERN projects — LMS and portfolio (links below)
- Full auth system: JWT, bcrypt, role-based access, protected routes
- Intensive 3-month MERN bootcamp — shipped 4 production apps
- Hackathon winner — delivered a working solution under time pressure

I would welcome a short technical task or interview at your convenience. Thank you for considering my application.

Sincerely,

Saksham Khadka
